

Curl

The “-” commands are used to interact with the IP address (website URL) by requesting specific GET and POST commands via the “-” commands.

1. Curl -I
 - a. Shows only response headers
2. Curl -data
 - a. Posts data you attach
3. Curl -v
 - a. Shows a lot of headers
4. Curl -H
 - a. Used for post requests
5. Curl -X
 - a. Used to POST as opposed to GET
